**RE: Energy East Pipeline Project**

The Council for the Rural Municipality of Miry Creek No. 229 (RM) writes in promotion of the TransCanada Energy East Pipeline Project. First-hand experience of the significant economic, environmental and social benefits resulting from TransCanada operations provides the basis for their collective support.

This project is assured to generate enhanced economic benefits at all levels of government. Specific to the RM, constituents will profit through reduced taxes, employment opportunities and community support.

Pipelines have proven to be the safest and most effective way to move crude oil. The project reduces the intensity of environmental impact when measured against alternative modes of transport. TransCanada, through exceptional safety and environmentally sound management practices is actively reducing the ecological footprint and will continue to do so with the Energy East project.

As more people understand the project and ensuing benefits they will collaboratively support the Energy East Pipeline Project as the safest and cleanest way to move this resource while generating extensive economic gains for the municipality, the province, and the country. Thank you.

On Behalf of Council,

Jan Stern  
Administrator
